CORRECTION

In the article entitled, “Myofilament Remodeling and Function Is More Impaired in Peripartum Cardiomyopathy Compared with Dilated Cardiomyopathy and Ischemic Heart Disease” (Volume 187, pages 2645–2658 of the December 2017 issue of *The American Journal of Pathology*; <https://doi.org/10.1016/j.ajpath.2017.08.022>), there are two issues in figures that need to be updated.

In Figure 3D, the y-axis label is incorrect as printed, and should be updated to read “glutathionylated cMyBP-C/cMyBP-C.” The figure legend and results are correct as published. The authors noted this error after production and brought it to the attention of the editorial office.

In Figure 5I there is also an update that was requested by the authors during proof but inadvertently overlooked by the production team during the revision process. This panel should only include 4 DCM samples, as noted in the legend; the image that was published incorrectly retained one sample from a different study group.

Both corrected images are included here. Neither of these corrections impacts the conclusions or results presented in this study.
