The American Journal of PATHOLOGY

Cellular and Molecular Biology of Disease

Editor-in-Chief
Kevin A. Roth, Columbia University College of Physicians and Surgeons

Senior Associate Editor
Martha B. Furie, Stony Brook University

Senior Associate Editors
John C. Chatham, University of Alabama at Birmingham
Robin G. Lorena, University of Alabama at Birmingham

Associate Editors
Chris Albanese, Georgetown University Medical Center
William B. Coleman, University of North Carolina Chapel Hill
Zoran Culig, Medical University of Innsbruck
Patricia A. D’Amore, Schepens Eye Research Institute — Massachusetts Eye and Ear
Lora Hedrick Ellenson, Cornell University
Philippe G. Frank, The University of Tours
Philip Furmanski, Rutgers University
Nisha Jain Garg, University of Texas Medical Branch
Michael S. Goligorsky, New York Medical College
Meera Hameed, Memorial Sloan-Kettering Cancer Center
Christopher G. Kevil, Louisiana State University Health Sciences Center
Andrew A. Lackner, Tulane University
Satarshan (Paul) Singh Monga, University of Pittsburgh School of Medicine
David J. Nikolic-Paterson, Monash Medical Center
Drucilla Roberts, Massachusetts General Hospital
Shin’ichi Takeda, National Center of Neurology and Psychiatry
Jouni Uitto, University of Michigan
Satdarshan (Paul) Singh Monga, Monash Medical Center
Andrew A. Lackner, Tulane University
Satarshan (Paul) Singh Monga, University of Pittsburgh School of Medicine
David J. Nikolic-Paterson, Monash Medical Center
Drucilla Roberts, Massachusetts General Hospital
Shin’ichi Takeda, National Center of Neurology and Psychiatry
Jouni Uitto, University of Michigan

Managing Editor
Audra E. Cox, PhD, ELS

Assistant Managing Editor
Emily H. Essex

Production Editor
Henry L. Carter, Jr.

Scientific Editor
Chihavi Chauhan, PhD

Editorial Assistants
Michael Dustin (Sr.), Dia Pellerin, Angela L. Schmeckebier (Birmingham)

The official journal of the American Society for Investigative Pathology, published by Elsevier, Inc., seeks to publish high-quality, original papers on the cellular and molecular biology of disease. The editors accept manuscripts that advance basic and translational knowledge of the pathogenesis, classification, diagnosis, and mechanisms of disease, without preference for a specific analytic method. High priority is given to studies on human disease and relevant experimental models using cellular, molecular, animal, biological, chemical, and immunological approaches in conjunction with morphology.
