Discoveries in Basic and Translational Pathobiology

Editor-in-Chief
Martha B. Furie, Stony Brook University

Senior Associate Editors
William B. Coleman, University of North Carolina Chapel Hill
Richard N. Mitchell, Brigham and Women’s Hospital and Harvard Medical School

Associate Editors
Chris Albanese, Georgetown University Medical Center
David M. Hackenberg, Fred Hutchinson Cancer Research Center
Yoshifumi Itoh, University of Oxford

Past Presidents:
George K. Michalopoulos; William A. Muller; Diane Bielenberg;
Magali Saint-Geniez, Mark E. Sobel, William G. Stetler-Stevenson, Cecelia Yates.

PUBLICATIONS COMMITTEE:
Patricia A. D’Amore (Chair), Steven Carroll, Prathana Dalal, Yava Jones-Hall, Sadarshan (Paul) Singh Monga, Morgan Pressinos, Daniel G. Remick, Magali Saint-Geniez, Mark E. Sobel, William G. Stetler-Stevenson, Cecelia Yates.

The official journal of the American Society for Investigative Pathology, published by Elsevier, Inc., seeks high-quality original research reports, reviews, and commentaries related to the molecular and cellular basis of disease. The editors will consider basic, translational, and clinical investigations that directly address mechanisms of pathogenesis or provide a foundation for future mechanistic inquiries. Examples of such foundational investigations include data mining, identification of biomarkers, molecular pathology, and discovery research. High priority is given to studies of human disease and relevant experimental models using molecular, cellular, and organismal approaches.
