

The American Journal of  
**PATHOLOGY**

Discoveries in Basic and Translational Pathobiology

**Table of Contents**

---

January 2020

Volume 190

Number 1

---

**On the Cover:** Fluorescence microscopy highlighting green fluorescent protein (green), tdTomato (red) and DAPI (blue) expression in histologic sections of skin. (See page 206.)

---

**1 This Month in AJP**

---

**Reviews**

---

- 2** Cell of Origin and Immunologic Events in the Pathogenesis of Breast Implant–Associated Anaplastic Large-Cell Lymphoma  
*Suzanne D. Turner, Giorgio Inghirami, Roberto N. Miranda, and Marshall E. Kadin*
- 11** A Guide for the Use of the Ferret Model for Influenza Virus Infection  
*Jessica A. Belser, Alissa M. Eckert, Thanhthao Huynh, Joy M. Gary, Jana M. Ritter, Terrence M. Tumpey, and Taronna R. Maines*

**Mini-Review**

---

- 25** The Major Histocompatibility Complex Class II–CD4 Immunologic Synapse in Alcoholic Hepatitis and Autoimmune Liver Pathology: The Role of Aberrant Major Histocompatibility Complex Class II in Hepatocytes  
*Jiajie G. Lu, Ping Ji, and Samuel W. French*

**Commentary**

---

- 33** Lymphotoxin-Beta Receptor Signaling Is Crucial for the Vascularization of Transplanted Metanephros  
*Valerio Brizi and Christodoulos Xinaris*  
★ Related article appears on page 252

**Regular Articles**

---

**Biomarkers, Genomics, Proteomics, and Gene Regulation**

- 37** Non-SMC Condensin I Complex Subunit D2 Is a Prognostic Factor in Triple-Negative Breast Cancer for the Ability to Promote Cell Cycle and Enhance Invasion  
*Yajing Zhang, Fangfang Liu, Chengli Zhang, Meijing Ren, Manchao Kuang, Ting Xiao, Xuebing Di, Lin Feng, Li Fu, and Shujun Cheng*

**Cardiovascular, Pulmonary, and Renal Pathology**

- 48** Increased Smooth Muscle Kv11.1 Channel Expression in Pulmonary Hypertension and Protective Role of Kv11.1 Channel Blocker Dofetilide  
*Nataliia V. Shults, Vladyslava Rybka, Yuichiro J. Suzuki, and Tinatin I. Brelidze*

**Gastrointestinal, Hepatobiliary, and Pancreatic Pathology**

- 57** Intestinal Epithelial Chemokine (C-C Motif) Ligand 7 Overexpression Enhances Acetaminophen-Induced Hepatotoxicity in Mice  
*Mengwei Niu, Zhihong Luo, Shenhai Gong, Sanda Win, Neil Kaplowitz, Yong Jiang, and Peng Chen*

- 68** Ferroptosis Affects the Progression of Nonalcoholic Steatohepatitis via the Modulation of Lipid Peroxidation—Mediated Cell Death in Mice  
*Jing Qi, Jong-Won Kim, Zixiong Zhou, Chae-Woong Lim, and Bumseok Kim*

- 82** Intestinal SIRT1 Deficiency Protects Mice from Ethanol-Induced Liver Injury by Mitigating Ferroptosis  
*Zhou Zhou, Ting Jie Ye, Elizabeth DeCaro, Brian Buehler, Zachary Stahl, Gregory Bonavita, Michael Daniels, and Min You*

- 93** Single-Cell RNA Sequencing Identifies Yes-Associated Protein 1—Dependent Hepatic Mesothelial Progenitors in Fibro-lamellar Carcinoma  
*Mark L. Jewell, Jason R. Gibson, Cynthia D. Guy, Jeongeun Hyun, Kuo Du, Seh-Hoon Oh, Richard T. Premont, David S. Hsu, Thomas Ribar, Simon G. Gregory, and Anna Mae E. Diehl*

### **Growth Factors, Cytokines, and Cell Cycle Molecules**

- 108** Keratinocyte Growth Factor Reduces Injury and Leads to Early Recovery from Cyclophosphamide Bladder Injury  
*Sridhar T. Narla, Daniel S. Bushnell, Caitlin M. Schaefer, Mehdi Nouraei, and Carlton M. Bates*

### **Immunopathology and Infectious Diseases**

- 125** Neurokinin-1 Receptor Antagonism Ameliorates Dry Eye Disease by Inhibiting Antigen-Presenting Cell Maturation and T Helper 17 Cell Activation  
*Man Yu, Sang-Mok Lee, Hyunsoo Lee, Afsaneh Amouzegar, Takeshi Nakao, Yihe Chen, and Reza Dana*

### **Metabolic, Endocrine, and Genitourinary Pathobiology**

- 134** RNA Expression Profiling of Lymphoepithelioma-Like Carcinoma of the Bladder Reveals a Basal-Like Molecular Subtype  
*Ujjawal Manocha, Jordan Kardos, Sara Selitsky, Mi Zhou, Steven M. Johnson, Cori Breslauer, Jonathan I. Epstein, William Y. Kim, and Sara E. Wobker*

- 145** Involvement of Transcription Factor 21 in the Pathogenesis of Fibrosis in Endometriosis  
*Umida Ganieva, Tomoko Nakamura, Satoko Osuka, Bayasula, Natsuki Nakanishi, Yukiyo Kasahara, Nobuyoshi Takasaki, Ayako Muraoka, Shotaro Hayashi, Takashi Nagai, Tomohiko Murase, Maki Goto, Akira Iwase, and Fumitaka Kikkawa*

- 158** Role of Mechanistic Target of Rapamycin and Autophagy in Alcohol-Induced Adipose Atrophy and Liver Injury  
*Yuan Li, Xiaojuan Chao, Shaogui Wang, Jessica A. Williams, Hong-Min Ni, and Wen-Xing Ding*

### **Molecular Pathogenesis of Genetic and Inherited Diseases**

- 176** Innate Immune Signaling Contributes to Tubular Cell Senescence in the *Glis2* Knockout Mouse Model of Nephronophthisis  
*Heng Jin, Yan Zhang, Dingxiao Liu, Shan Shanshan Wang, Qiong Ding, Prerna Rastogi, Madison Purvis, Angela Wang, Sarah Elhadi, Chongyu Ren, Chao Cao, Yanfen Chai, Peter Igarashi, Anton M. Jetten, Dongmei Lu, and Massimo Attanasio*

- 190** Total Absence of Dystrophin Expression Exacerbates Ectopic Myofiber Calcification and Fibrosis and Alters Macrophage Infiltration Patterns  
*Christopher N.J. Young, Maxime R.F. Gosselin, Robin Rumney, Aleksandra Oksiejuk, Natalia Chira, Lukasz Bozycki, Pawel Matryba, Kacper Lukasiewicz, Alex P. Kao, Joseph Dunlop, Samuel C. Robson, Krzysztof Zablocki, and Dariusz C. Górecki*

### **Tumorigenesis and Neoplastic Progression**

- 206** Insights into Fibroblast Plasticity: Cellular Communication Network 2 Is Required for Activation of Cancer-Associated Fibroblasts in a Murine Model of Melanoma  
*Matthew Tsang, Katherine Quesnel, Krista Vincent, James Hutchenreuther, Lynne-Marie Postovit, and Andrew Leask*

- 222** IL-17—CXC Chemokine Receptor 2 Axis Facilitates Breast Cancer Progression by Up-Regulating Neutrophil Recruitment  
*Lingyun Wu, Mohammad Awaji, Sugandha Saxena, Michelle L. Varney, Bhawna Sharma, and Rakesh K. Singh*

- 234** Two Distinct Tumorigenic Processes in Endometrial Endometrioid Adenocarcinoma  
*Yuko Sugiyama, Osamu Gotoh, Nobuyuki Fukui, Norio Tanaka, Katsuhiko Hasumi, Yutaka Takazawa, Tetsuo Noda, and Seiichi Mori*

***Vascular Biology, Atherosclerosis, and Endothelium Biology***

- 252** Host Lymphotoxin- $\beta$  Receptor Signaling Is Crucial for Angiogenesis of Metanephric Tissue Transplanted into Lymphoid Sites

*Maria Giovanna Francipane, Bing Han, and Eric Lagasse*
