

CORRECTION

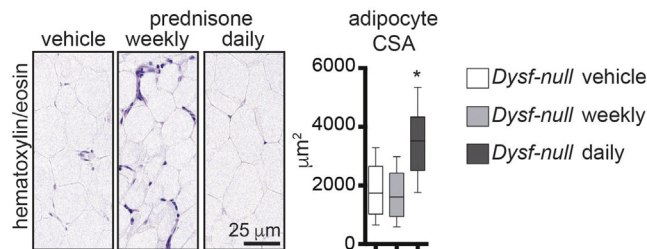

In the article entitled, “Intermittent Glucocorticoid Dosing Improves Muscle Repair and Function in Mice with Limb-Girdle Muscular Dystrophy” (Volume 187, pages 2520–2535 of the November 2017 issue of *The American Journal of Pathology*; DOI: <https://doi.org/10.1016/j.ajpath.2017.07.017>) the authors have noticed a labeling error in two of the Supplemental Figures. The key for the bar graphs incorrectly reflect *Dysf-null* vehicle, *Dysf-null* prednisone,

and *Dysf-null* deflazacort and these labels should read *Dysf-null* vehicle, *Dysf-null* weekly, and *Dysf-null* daily. The two images are being replaced with the updated versions below. The legends for these figures are correct as published and this labeling error does not change the claims or conclusions presented in this manuscript.
