Table of Contents

April 2024
Volume 194
Number 4

On the Cover: Immunostaining of transverse heart sections with anti-CD45 (pan-leukocyte marker) at 24 hours after reperfusion. (See page 562.)

475 This Month in AJP

Guest Editorial

Advances in Understanding Cardiovascular Disease Pathogenesis Theme Issue

476 Advances in Understanding Cardiovascular Disease Pathogenesis through Next-Generation Technologies
Cyrine Ben Dhaou, Matthew L. Scott, and A. Wayne Orr

Reviews

Advances in Understanding Cardiovascular Disease Pathogenesis Theme Issue

482 Omics Approaches Unveiling the Biology of Human Atherosclerotic Plaques
Xun Wu and Hanrui Zhang

499 The Role of Endothelial Cells in Atherosclerosis: Insights from Genetic Association Studies
Mark E. Pepin and Rajat M. Gupta

510 Amino Acid Metabolism and Atherosclerotic Cardiovascular Disease
Samit Kumar Anand, Therese-Anne Governale, Xiangyu Zhang, Babak Razani, Arif Yardagul, Jr, Christopher B. Pattillo, and Oren Rom

525 Nuclear Control of Vascular Smooth Muscle Cell Plasticity during Vascular Remodeling
Ibrahim A. Ahmed, Mingjun Liu, and Delphine Gomez

539 Multimodal Analytical Tools to Enhance Mechanistic Understanding of Aortic Valve Calcification
Katelyn A. Perez, Daniel W. Doppe, Aidan Filas, Sasha A. Singh, and Elena Aikawa

Review

551 Understanding One Half of the Sex Difference Equation: The Modulatory Effects of Testosterone on Diabetic Cardiomyopathy
Mika’il Visanji, Daniel E. Venegas-Pino, and Geoff H. Werstuck

Regular Articles

Cardiovascular, Pulmonary, and Renal Pathology

562 Exogenous Transforming Growth Factor-β1 and Its Helminth-Derived Mimic Attenuate the Heart’s Inflammatory Response to Ischemic Injury and Reduce Mature Scar Size
Vascular Biology, Atherosclerosis, and Endothelium Biology

574 Defining the Functional Influence of Endothelial Cell—Expressed Oncogenic Activating Mutations on Vascular Morphogenesis and Capillary Assembly
Prisca K. Lin, Zheying Sun, and George E. Davis

599 DOCK2 Promotes Atherosclerosis by Mediating the Endothelial Cell Inflammatory Response
Guoqing Qian, Oluwaseun Adeyanju, Dunpeng Cai, Torry A. Tucker, Steven Idell, Shi-You Chen, and Xia Guo

612 High-Mannose-Type Glycan of Basigin in Endothelial Cells Is Essential for the Opening of the Blood—Brain Barrier Induced by Hypoxia, Cyclophilin A, or Tumor Necrosis Factor-α
Dan Cui, Kazuo Yamamoto, and Eiji Ikeda
