

Astolfi *et al.*
Supplemental Figure S1

Supplemental Figure S1. Clustering by 6x1 Self Organizing Maps of the “vaccination” gene list on the three time points of vaccination time course. The genes in each cluster are shown in Figure 3. Raw data from all the samples and cluster membership is reported for each gene in Supplemental Table A.

Astolfi et al.
Supplemental Figure S2

Supplemental Figure S2. Clustering by 3x3 Self Organizing Maps of the “tumor” gene list on the four time points of tumor growth. Gene Ontology categories and the corresponding percentage of representation in the list are indicated within each graph. Raw data from all the samples and cluster membership is reported for each gene in Supplemental Table C.
